## 1.1 Render

### advantages

**TEXT:**

<p>reeeeeeee</p>

### definition

**TEXT:**

<p>render</p>

**TEXT:**

React elements are immutable. Once you create an element, you can't change its children or attributes. An element is like a single frame in a movie: it represents the UI at a certain point in time. With our knowledge so far, the only way to update the UI is to create a new element, and pass it to ReactDOM.render()
