

REACT

reactify

Published/Createdby Aqib Shaik

Introduction

This book gives insight about REACT domain. This is basically an e-book generated by any user zynla user. This book contains data in the form of answer populated by zynla user.

Table of Contents

Chapter 1:Render

Chapter 1

Render

Advantages

Text:

<p>reeeeeeee</p>

Definition

Text:

React elements are immutable. Once you create an element, you can't change its children or attributes. An element is like a single frame in a movie: it represents the UI at a certain point in time. With our knowledge so far, the only way to update the UI is to create a new element, and pass it to ReactDOM.render()

<p>render</p>

1.1 Key

definition

Blog:

<https://facebook.github.io/react/docs/lists-and-keys.html>

Video:

<https://www.youtube.com/watch?v=AH5Gom8gIZo>

Text:

React keys are useful when working with dynamically created components or when your lists are altered by users. Setting the key value will keep your components uniquely identified after the change

1.1.1 Forms

definition

Text:

HTML form elements work a little bit differently from other DOM elements in React, because form elements naturally keep some internal state
